EDUCATION

ASTANA IT UNIVERSITY

BACHELOR'S DEGREE IN BIG DATA ANALYSIS

September 2024 - Present

CERTIFICATES

- IBM SkillsBuild

1. CERTIFICATE 1
2. CERTIFICATE 2

SKILLS

- *Data analysis:* Python (pandas, NumPy, SciPy, scikit-learn, statsmodels), Jupyter Notebook
- *SQL & databases:* SQL (SELECT, JOIN, GROUP BY, window functions); PostgreSQL, MySQL, MongoDB
- *Visualization:* Power BI, matplotlib, seaborn, Excel PivotTables
- *Data science:* EDA, feature engineering, Bayesian inference, time-series forecasting, model validation
- *Engineering tools:* Git/GitHub, Node.js, Express.js, REST APIs, Mongoose, JWT

PROFILE

Big Data Analysis student at Astana IT University seeking a Junior Data Analyst internship. Brings hands-on academic project experience in Python analytics, SQL/NoSQL databases, statistical modelling, time-series forecasting, data visualization, and reproducible reporting.

WORK EXPERIENCE

Private Mathematics Tutor

2023-2025

- Provided individual mathematics lessons to senior high-school students.
- Prepared students for exams and adapted materials to their learning needs.

PROJECTS

Heston Stochastic Volatility: SPY Options Calibration

- Built a Python workflow for calibrating the Heston model to SPY options data using NumPy, pandas, and SciPy.
- Applied numerical optimization and evaluated model accuracy using RMSE.

Music Store: NoSQL Database Application

- Developed a MongoDB database and REST API using Node.js, Express, and Mongoose.
- Implemented CRUD operations, JWT authentication, role-based access, search, and revenue analytics.

Bike-Sharing Demand Modelling

- Analysed 17,379 records using Python, pandas, NumPy, and visualization libraries.
- Built Bayesian, SARIMAX, Markov, and machine-learning models and compared them using MAE, RMSE, and R^2.
